### SUMMARY

I'm a software developer with a passion for creating all kinds of web applications and games, as well as studying new technologies and programming languages. My goal is to extend my knowledge as much as I can, gain experience solving interesting problems, and improve myself as a person. I'm always up for a challenge, so go ahead and offer me one!

### PROJECTS

#### LetMeCook

🔗 <https://main-letmecook.vercel.app>

LetMeCook is an online meal planner, designed to help its users in their journey towards healthier eating habits. The application allows users easily to store their recipes, generates personalized meal plans based on dietary preferences, and provides nutritional insights and an intuitive way to schedule meals.

- In the project are use the following technologies - React, Next.js, NextAuth, Prisma, TailwindCSS and tRPC.

#### TOURISTER

🔗 <https://github.com/PMU-PROJECT/tourister-client>

Tourister is the digital version of the booklet of the 100 national tourist sites. The goal of the application is to help the Bulgarian tourist by providing information about all tourist sites a few clicks away and to digitize the morally outdated system of paper books.

- This project was build by a team of three developers, on a development cycles using agile methodology.
- The mobile client of the app was build with React Native, Redux, Expo and SQLite.

#### NFT Auction

🔗 <https://github.com/genadi53/NFT-Auction>

This is an online NFT selling platform, in witch users can discover popular and trending NFTs, have profiles that show their collections and also place bids in auctions.

- NFT Auction is a single-page web app built with React and Next.js, using Material UI and SASS for styling.
